SUMMARY

Software Engineer with 7+ years of experience building scalable, distributed systems in the cloud. I specialize in Java, Kotlin and Python, and have a strong focus on clean architecture, observability and reliability at scale. I regularly share engineering insights and lessons learned on my [blog](#).

EXPERIENCE

Software Engineer

Dec. 2023 – Present

Timefold

Remote, Belgium

- Early engineer on the Platform team (second hire), built the platform from scratch for scheduling optimization workloads (e.g. employee shifts, vehicle routing)
- Designed and implemented core backend systems using Java and Quarkus
- Deployed and operated workloads on Kubernetes across AWS, Azure, and GCP, enabling customers to run complex planning jobs efficiently at scale

Software Engineer

Nov. 2021 – Nov. 2023

Blip

Remote, Portugal

- Built and maintained event-driven microservices for brands like Betfair, PaddyPower and FanDuel within Flutter Entertainment, a large-scale global organization
- Worked with Java, Kotlin and Scala, using Akka, Kafka, Spring and Flink to ensure scalable and observable systems in a high-traffic environment

Software Engineer

Sep. 2019 – Nov. 2021

Talkdesk

Remote, Portugal

- Developed data-driven backend services using Java, Quarkus, and Apache Camel
- Built robust pipelines on AWS, processing 4M+ events daily with a focus on reliability, monitoring, and scalability

Student Researcher

Oct. 2017 – Aug. 2019

Instituto de Telecomunicações

Aveiro, Portugal

- Designed a distributed real-time architecture to forecast anomalies using machine learning techniques and act on the network to improve quality of service
- Developed a smart city monitoring platform with support for management, alerts and real-time actuation using Python and Django

Software Intern

Jul. 2016 – Aug. 2016

Aptoide

Lisbon, Portugal

- Built a tool to detect explicit content in the Aptoide Store using Python and ML techniques, achieving over 95% accuracy

EDUCATION

Integrated MSc in Computer and Telematics Engineering

2014 – 2019

University of Aveiro

Aveiro, Portugal

- Grade: 18.21/20 – Best student of the course (2018/2019). Dissertation grade: 20/20. Merit award recipient.

TECHNICAL SKILLS

Languages: Java, Kotlin, Python, Scala, Elixir

Frameworks: Spring, Quarkus, Apache Camel, Akka, Flink, Phoenix, FastAPI, Django

Cloud & DevOps: Kubernetes, Docker, AWS, Azure, Google Cloud, Helm, GitHub Actions, Jenkins

Data & Messaging: Kafka, RabbitMQ, PostgreSQL, MongoDB, Elasticsearch
